

Hey Nordeus HR,

I hope this message finds you well! I couldn't contain my excitement when I stumbled upon the job opening for the Graphic Designer position at Nordeus. As a die-hard gaming enthusiast and a superfan of Nordeus, I just had to reach out and throw my hat into the ring for this incredible opportunity!

Let me start by saying that Nordeus rocks! I started playing top eleven on the 29. 09. 2011. and I played it through the whole elementary and high school. Top Eleven is the one and only game to this day that I make an in-app purchase, I bought some tokens using my prepaid credit. I liked my scout payers more than everything. Top Eleven has been a constant source of joy and inspiration for me. From the addictive gameplay to the stunning visuals and captivating storylines, I was most happy building the stadium and trying to win the league.

As soon as I found out that Nordeus is actually in Serbia, it instantly became my goal to work there one day. I wanted to apply for a long time for design-related positions at Nordeus for a very long time, I wanted to apply for a recent "Junior UI designer" position, but I didn't get to finish my portfolio. But... better late than ever?

I honestly can't think of a more amazing place to work than a company that consistently pushes the boundaries of innovation and delivers unforgettable gaming experiences.

I've always dreamt of turning my passion for gaming into a career, and joining the Nordeus family would be an absolute dream come true.

What really sets Nordeus apart for me is the incredible culture you've fostered. Your commitment to innovation, teamwork, and creating a supportive work environment is something I genuinely admire. I firmly believe that the best games are created when talented individuals from diverse backgrounds come together, sharing their ideas and pushing each other to new heights.

But my love for a Nordeus aside, I have 5+ years of experience constantly working as a graphic designer, photographer, and video editor. Im striving to be the best possible version of myself every day. Im constantly learning new things, new design techniques, and other ways to improve. But it's not just about the technical stuff.

In addition to my skills and expertise, I bring a positive and energetic attitude to the table. I thrive in fast-paced environments and love tackling challenges head-on. Throughout my career, I've consistently delivered top-notch results while working under tight deadlines. With strong attention to detail and a passion for excellence, I'm confident that I can make a real impact at Nordeus.

Thank you for considering my application. I've attached my resume for your convenience, providing more details about my background, I also send you my portfolio on a GitHub link (please open it from a desktop).

I would be absolutely thrilled to have the chance to discuss my love for the gaming industry, and my other passions.

Looking forward to the possibility of joining the Nordeus family!

Warm regards,

Filip Đorđević
